Why now AcSEED ?

Ever since capitalist society started in the 17th century, we have believed that by belonging to a company would bring us economical security
However, with cutting-edge technology like AI bringing industrial changes or with the economic crisis brought by COVID-19, the world is rapidly changing.

What is required for us is “change of values” and “self-supporting economic power”
The bottom line is, the time requiring financial management skills by individuals is approaching right at this very moment.

AcSEED was established as an EdTech (education × technology) company to make every individual the main character and support learning global finance.
